Elite Reverse Perspective	Elite Reverse Perspective 2° ÷ 15° / 20÷750mm / Check out some sample footage we shot!	
Century Precision Optics 9.8mm T2.3	The Century 9.8mm T2.3 is a rehoused Kinoptik Tégéa 9.8mm T2.3 by Century Precision Optics, which has an internal 2x2 filter capability and is designed to cover the 35mm film format. / Comes with 4 different filters.	
Laowa 24mm f/14 2X Macro Probe Lens	The Laowa 24mm f/14 Macro Probe lens with PL mount is specifically designed to produce extreme macro images on full frame cameras. This lens has a super narrow size and is extremely light (only 474 grams). Also because it has a built-in LED and is waterproof, the lens opens a world of possibilities for what it is able to capture — things that other macro lenses can't.	
Zenit Petzval 85mm T2.3 TLS	Swirly bokeh with a sharp center. Good for creative portraits shots. From the successful Lomography Kickstarter but rehoused by TLS to fit cinematographers needs. Comes with a 16 blade iris!

Sony AXS-R7 2K/4K RAW Recorder (F5, F55, VENICE)	€100 if rented with Sony F55/F5. Comes free with the Sony VENICE // 16-bit linear RAW Recorder follows the original AXS-R5. Created in response to Cinematographers of feature film, commercials, reality, documentary, wildlife, and underwater production, among other genres, the R7 delivers continuous 4K 120 FPS recording (with the F55), up to 30 seconds of cache recording, a rugged chassis, more rigid attachment to the camera. It also features dual media slots. In the case of Venice, the media slots unlock the ability for RAW / X-OCN and XAVC 4K simultaneous internal recording. AXS-R7 offers dual recording slots to accept AXSM A Series S48 memory cards. Compared to previous Sony 4K recorders, the new recorder doubles the maximum record frame rate in 4K RAW from 60 FPS up to 120 FPS with Sony's F55 camera. For shooting at higher frame rates, the recorder captures 2K RAW at up to 240 FPS from the F55 and F5 for playback at 10x super slow motion. With the recorder docked to the F55 and F5, cinematographers can take advantage of RAW cache recording at 23.98P for up to approximately 30 seconds while in standby mode, an important feature in documentary or wildlife production where capturing spontaneous action is required.	€ 250,00
